Response – Final Rejection

Responsive to the Official Action dated 03/13/2008.

Reconsideration is respectfully requested of the rejection of the claims under 35 USC 103(a) as being unpatentable over Lezdey et al, Henley et al and Perricone in view of Weiner and Gray.

The first issue is why Perricone is considered as being pertinent and would contribute to Lezdey et al. Perricone relates to treating skin with polyphenol obtained from olive oil. Polyphenol is not related in any form to cromolyn. Cromolyn has been used for 30 years for treating asthma in children. Does the Examiner believe that polyphenol would also treat asthma? Polyphenol is not a par-2 antagonist. It does not relate chemically or in mode of action in treating inflammation or diaper rash. Olive oil with polyphenols has been used to treat skin and inflammation since Roman times for gladiators. There was never a connection to cromolyn. To combine Perricone to Lezdey et al is to combine apples and oranges. This is correct since green apples contain
